Managing Work at Height-1 day	Pre requisite:	None
Course Aims		
<p>This one day course is intended to provide delegates with the knowledge and the skills to manage those who work at height.</p> <p>During the course delegates will receive broad based training in the basic skills and techniques of working at heights to national standards.</p>		
Course Delivery		
<p>Where possible the course leader will use risk assessment systems, forms and equipment adopted by the client and in so doing reinforce their value and availability to delegates.</p>		
Who is the Course For?		
<p>Supervisors & Managers</p>		
Outline Syllabus		
Introduction		
<p>Course design: The course follows the practical steps associated with the risk assessment process outlined in the Health and Safety Executive's (HSE's) 5 Steps to Risk Assessment and results in delegates completing a mini risk assessment for a work area of their own choice.</p>		
Learning Outcomes		
<p>At the end of the course delegates will:</p>		
<ul style="list-style-type: none">• Be able to identify the main requirements of the Control of Work at Height Regulations 2005 (WAHR).• Be able to plan, organise, and co-ordinate their own work at height, whilst adopting safe working practice• Be able to explain how to erect and work safely on Tower Scaffolding• Be able to undertake the Inspection and storage of equipment used in work at height• Understand the concept of safety equipment, safe routes and safety hazards• Be able to Identify and name types of access equipment and general components		
End test		
<p>The course will conclude with a short written test, designed to confirm understanding of the key learning points.</p>
